How to add watermark and fit within resize for fit within resize VB in VB.NET and ByteScout Watermarking SDK

How to add watermark and fit within resize for fit within resize VB in VB.NET: Step By Step Tutorial

Source code documentation samples provide quick and easy way to add a required functionality into your application. Fit within resize VB in VB.NET can be implemented with ByteScout Watermarking SDK. ByteScout Watermarking SDK is the library for software developers that can be used to quickly add image watermarking features into your web or desktop applications. Use ready to use presets or create your own to be applied for input PNG, JPG, BMP images. Can customize fonts, text position and rotation if required.

Fast application programming interfaces of ByteScout Watermarking SDK for VB.NET plus the instruction and the code below will help to learn how to add watermark and fit within resize. Open your VB.NET project and simply copy & paste the code and then run your app! Use of ByteScout Watermarking SDK in VB.NET is also explained in the documentation included along with the product.

Trial version of ByteScout is available for free download from our website. This and other source code samples for VB.NET and other programming languages are available.

Source Code Files:

Module1.vb

```vb
Imports System
Imports System.Diagnostics
Imports System.Drawing
Imports System.Collections.Generic
Imports Bytescout.Watermarking
Imports Bytescout.Watermarking.Presets

Module Module1

    Sub Main()
        ' Create Watermarker instance
        Dim waterMarker As New Watermarker()

        ' Initialize library
        waterMarker.InitLibrary("demo", "demo")

        ' Set input file name
        Dim inputFilePath As String = "my_sample_image.jpg"
        ' Set output file title
        Dim outputFilePath As String = "my_sample_output.jpg"

        ' Add image to apply watermarks to
        waterMarker.AddInputFile(inputFilePath, outputFilePath)

        ' Allow resize
        waterMarker.OutputOptions.Resize = True

        ' Allow to enlarge image
        waterMarker.OutputOptions.DontEnlargeSmallImages = False

        ' Set resize type to pixels
        waterMarker.OutputOptions.ResizeType = ResizeType.Pixels

        ' Fit to width
        waterMarker.OutputOptions.ResizeFitWithin = FitWithin.WidthOnly

        ' Set width
        waterMarker.OutputOptions.ResizeWidthInPixels = 600

        ' Set height
        waterMarker.OutputOptions.ResizeHeightInPixels = 20

        ' Set output directory
        waterMarker.OutputOptions.OutputDirectory = "."

        ' Apply watermarks
        waterMarker.Execute()

        ' open generated image file in default image viewer installed in Windows
        Process.Start(outputFilePath)
    End Sub
```

```
End Module
```
