

How to add and show progress indicator in VB.NET and ByteScout Watermarking SDK

This tutorial will show how to add and show progress indicator in VB.NET

Add and show progress indicator is easy to implement in VB.NET if you use these source codes below. ByteScout Watermarking SDK is the library for software developers that can be used to quickly add image watermarking features into your web or desktop applications. Use ready to use presets or create your own to be applied for input PNG, JPG, BMP images. Can customize fonts, text position and rotation if required and you can use it to add and show progress indicator with VB.NET.

Fast application programming interfaces of ByteScout Watermarking SDK for VB.NET plus the instruction and the code below will help you quickly learn how to add and show progress indicator. Just copy and paste the code into your VB.NET application's code and follow the instruction. Detailed tutorials and documentation are available along with installed ByteScout Watermarking SDK if you'd like to dive deeper into the topic and the details of the API.

Download free trial version of ByteScout Watermarking SDK from our website with this and other source code samples for VB.NET.

VB.NET - Program.vb

```
Imports System.IO
Imports ByteScout.Watermarking
Imports ByteScout.Watermarking.Presets

Class Program
    Friend Shared Sub Main(args As String())
        ' Create Watermarker instance
        Dim waterMarker As New Watermarker()

        ' Initialize library
        waterMarker.InitLibrary("demo", "demo")

        ' Add images to apply watermarks to
        waterMarker.AddInputFile("image1.jpg", "image1_watermarked.jpg")
        waterMarker.AddInputFile("image2.jpg", "image2_watermarked.jpg")
        waterMarker.AddInputFile("image3.jpg", "image3_watermarked.jpg")

        ' Create new watermark
        Dim preset As New TextFitsPage()

        ' Set watermark text
        preset.Text = "My Watermark (c) Me 2010"
```

```
' Add watermark to watermarker
waterMarker.AddWatermark(preset)

' Add Progress event handler
AddHandler waterMarker.Progress, New ProgressEventHandler(AddressOf
waterMarker_Progress)

' Apply watermarks
waterMarker.Execute()

Console.WriteLine()
Console.WriteLine("Hit any key...")
Console.ReadKey()
End Sub

Private Shared Sub waterMarker_Progress(percent As Double, status As String,
processedFile As String, ByRef abort As Boolean)
    Dim message As String

    If Not String.IsNullOrEmpty(processedFile) Then
        message = String.Format("{0}: {1}: {2:f02}%",
Path.GetFileName(processedFile), status, percent)
    Else
        message = String.Format("{0}: {1:f02}%", status, percent)
    End If

    Console.WriteLine(message.PadRight(Console.WindowWidth))
End Sub
End Class
```
