resize image in percents in VB.NET and ByteScout Watermarking SDK

resize image in percents in VB.NET

Today you are going to learn how to resize image in percents in VB.NET. Resize image in percents in VB.NET can be implemented with ByteScout Watermarking SDK. ByteScout Watermarking SDK is the library for software developers that can be used to quickly add image watermarking features into your web or desktop applications. Use ready to use presets or create your own to be applied for input PNG, JPG, BMP images. Can customize fonts, text position and rotation if required.

This rich sample source code in VB.NET for ByteScout Watermarking SDK includes the number of functions and options you should do calling the API to implement resize image in percents. In order to implement this functionality, you should copy and paste code below into your app using code editor. Then compile and run your application. Use of ByteScout Watermarking SDK in VB.NET is also explained in the documentation included along with the product.

Trial version can be downloaded from our website. Source code samples for VB.NET and documentation are included.

Source Code Files:

Module1.vb

```vb
Imports System
Imports System.Diagnostics
Imports System.Drawing
Imports System.Collections.Generic
Imports Bytescout.Watermarking
Imports Bytescout.Watermarking.Presets

Module Module1

    Sub Main()
        ' Create Watermarker instance
        Dim waterMarker As New Watermarker()

        ' Initialize library
        waterMarker.InitLibrary("demo", "demo")

        ' Set input file name
        Dim inputFilePath As String = "my_sample_image.jpg"
        ' Set output file title
        Dim outputFilePath As String = "my_sample_output.jpg"

        ' Add image to apply watermarks to
        waterMarker.AddInputFile(inputFilePath, outputFilePath)

        ' Allow resize
        waterMarker.OutputOptions.Resize = True

        ' Set resize type to percentage
        waterMarker.OutputOptions.ResizeType = ResizeType.Percentage

        ' Reduce image by 1/2
        waterMarker.OutputOptions.ResizePercentage = 50

        ' Set output directory
        waterMarker.OutputOptions.OutputDirectory = "."

        ' Apply watermarks
        waterMarker.Execute()

        ' open generated image file in default image viewer installed in Windows
        Process.Start(outputFilePath)
    End Sub

End Module
```
