resize image in pixels in VB.NET using ByteScout Watermarking SDK

How to use ByteScout Watermarking SDK for resize image in pixels in VB.NET

These source code samples are listed and grouped by their programming language and functions they use. ByteScout Watermarking SDK was made to help with resize image in pixels in VB.NET. ByteScout Watermarking SDK is the library for software developers that can be used to quickly add image watermarking features into your web or desktop applications. Use ready to use presets or create your own to be applied for input PNG, JPG, BMP images. Can customize fonts, text position and rotation if required.

The SDK samples like this one below explain how to quickly make your application do resize image in pixels in VB.NET with the help of ByteScout Watermarking SDK. This VB.NET sample code should be copied and pasted into your application's code editor. Then just compile and run it to see how it works. Further enhancement of the code will make it more vigorous.

ByteScout Watermarking SDK is available as free trial. You may get it from our website along with all other source code samples for VB.NET applications.

Source Code Files:

Module1.vb

```vbnet
Imports System
Imports System.Diagnostics
Imports System.Drawing
Imports System.Collections.Generic
Imports Bytescout.Watermarking
Imports Bytescout.Watermarking.Presets

Module Module1

    Sub Main()
        ' Create Watermarker instance
        Dim waterMarker As New Watermarker()

        ' Initialize library
        waterMarker.InitLibrary("demo", "demo")

        ' Set input file name
        Dim inputFilePath As String = "my_sample_image.jpg"
        ' Set output file title
        Dim outputFilePath As String = "my_sample_output.jpg"

        ' Add image to apply watermarks to
        waterMarker.AddInputFile(inputFilePath, outputFilePath)

        ' Allow resize
        waterMarker.OutputOptions.Resize = True

        ' Set resize type to percentage
        waterMarker.OutputOptions.ResizeType = ResizeType.Pixels

        ' Set image width
        waterMarker.OutputOptions.ResizeWidthInPixels = 100

        ' Set image height
        waterMarker.OutputOptions.ResizeHeightInPixels = 100

        ' Set output directory
        waterMarker.OutputOptions.OutputDirectory = "."

        ' Apply watermarks
        waterMarker.Execute()

        ' open generated image file in default image viewer installed in Windows
        Process.Start(outputFilePath)
    End Sub

End Module
```
