

How to get PDF info from file (node for PDF information API in JavaScript with PDF.co Web API)

How to get PDF info from file (node for PDF information API in JavaScript: How To Tutorial)

Source code documentation samples provide quick and easy way to add a required functionality into your application. PDF.co Web API helps with PDF information API in JavaScript. PDF.co Web API is the Web API with a set of tools for documents manipulation, data conversion, data extraction, splitting and merging of documents. Includes image recognition, built-in OCR, barcode generation and barcode decoders to decode bar codes from scans, pictures and pdf.

JavaScript code samples for JavaScript developers help to speed up the application's code writing when using PDF.co Web API. Sample code in JavaScript is all you need. Copy-paste it to your the code editor, then add a reference to PDF.co Web API and you are ready to try it! You can use these JavaScript sample examples in one or many applications.

ByteScout free trial version is available for FREE download from our website. Programming tutorials along with source code samples are included.

JavaScript - GetPdfInfoFromFile.js

```
/*jshint esversion: 6 */  
  
var fs = require("fs");  
  
// `request` module is required for file upload.  
// Use "npm install request" command to install.  
var request = require("request");  
  
// The authentication key (API Key).  
// Get your own by registering at https://app.pdf.co/documentation/api  
const API_KEY = "*****";  
  
// Source PDF file to get information  
const SourceFile = "./sample.pdf";  
  
// Prepare URL for `PDF Info` API call  
var query = `https://api.pdf.co/v1/pdf/info`;  
let reqOptions = {  
  uri: query,  
  headers: { "x-api-key": API_KEY },  
  formData: {  
    file: fs.createReadStream(SourceFile)  }  
};
```

```
}  
};  
  
// Send request  
request.post(reqOptions, function (error, response, body) {  
  if (error) {  
    return console.error("Error: ", error);  
  }  
  
  // Parse JSON response  
  let data = JSON.parse(body);  
  if (data.error == false) {  
    // Display PDF document information  
    for (var key in data.info) {  
      console.log(`${key}: ${data.info[key]}`);  
    }  
  }  
  else {  
    // Service reported error  
    console.log("Error: " + data.message);  
  }  
});
```
